• *Summer Training*
 - **Training Overview:** completed training from Board Infinity on Data Structures and Algorithm, gaining proficiency in problem solving and optimization techniques.
 - **Project Work:** Developed a Library Management System, demonstrating expertise in software development, database management, and system design.

PROJECTS

- **Chat-App** Jan 25 - Feb 25
Developed a real-time messaging app using React for the frontend and Spring Boot for the backend. Enabled user authentication, seamless message exchange, and dynamic updates through WebSocket integration. Focused on creating a responsive and intuitive UI for a smooth chat experience across devices.
- **Forever-Ecommerce website – Frontend Developed using React** Sep 24 - Dec 24
Built a responsive e-commerce platform for selling kids', women's, and men's clothing. Developed the frontend with React, emphasizing a smooth, interactive, and user-friendly shopping experience. Designed an intuitive interface for effortless product browsing and seamless cart management.
- **Library Management System:** May 24 - June 24
Developed a C++-based system to efficiently manage a library's book inventory and borrowing process. Key features include adding, searching, issuing, returning, listing, and deleting books. Utilized data structures like arrays, linked lists, and stacks/queues, applying object-oriented programming principles. Gained hands-on experience in software development, improving problem-solving and system design skills. Result: Delivered a fully functional system that streamlined library operations, enhancing both book tracking and user experience.
